

Random facts about me:

1. I'm quite obsessed with the Dutch tv-show 'Wie is de Mol', I organize summer camps that mimic this show and have done so for 8 years now. However, the Flemish version of the tv-show is even better!
2. I can say the Dutch alphabet backwards really fast, probably even faster than forwards.
3. I am very good in knotting bracelets ('friendship bracelets' made of cotton).
4. I like board games a lot and have a lot of different ones. However, quite often I lack the company to play the games. I also organised a lot of games for friends like crazy 88 and comparable things.
5. I play the very Dutch sport 'korfbal', which is a mixed-gender team sport. I do have some disadvantage here because my height is relatively low for a Dutch male.
6. In my house, we have a cat called Kwartje. She has a constant expression of confusion, which makes her kind of cute.
7. Different types of pastas are my favourite food. I always have to make sure that I don't incorporate too many pastas in a week and eat varied.
8. I was born on Friday 13th, which obviously resulted in 13 being my favourite number.
9. As a child I had a really big fear of Snakes. I could not read a book if I knew that there was a picture of a snake somewhere in it. I can handle them better now, but I am still very careful in the zoo, waiting around the corner if I have the feeling that we are close to a snake or reptile house.
10. Since people apparently often have a hard time when a volume is on an uneven number, I try to have my tv volume on prime numbers as much as possible.
